Integrated speakers are spotted with G7-H1500C and additional intensity crystal sound for gaming and entertainments.

Enhanced Performance With Advanced Communication Features

The new Intel Celeron Dual Core T3000 (1.80GHz) processor enables simultaneous running of multiple programs. The standard memory reduces the system boot-up and programs start up time. The Fast Ethernet provides high speed network connectivity and allows you to save cost and multiple your interactions with overseas friends and loved ones instantly with no delay. The integrated microphone and 4 in 1 card reader enhance the capability of teleconferencing and sharing of various images and files with your friends.

Linux: A Least-Cost Alternative to windows

If you are underwhelmed by Vista, feels like a step back, then it might be time for your small business to try Linux

If you are looking for an alternative to windows vista and you prefer not to go back to the future with Vista, you might seriously consider the Linux open-source operating system as an option for your business. The latest distributions are free, easy to install, and highly customizable; they harness your existing hardware without overtaxing it; and they include a wealth of productivity applications and utilities.

Admittedly switching from Windows to Linux will incur some costs in time as employees and support staff adjust to the new operating system's configuration settings, utilities, and applications. Even so, the savings in future hardware and software upgrades could eventually be huge.
